WORK EXPERIENCE

FULLSTACK • GEEMSOLUTIONS • JANUARY 2024 – SEPTEMBER 2024

Areas of specialization include:

Angular, JavaScript (React, TypeScript), and a diverse range of technologies like PHP, Python, and frameworks such as Laravel.

Key projects at GeemSolutions:

Developed customized point-of-sale systems for industries like restaurants and retail.

Enhanced existing company systems to improve functionality and efficiency.

Designed and implemented innovative solutions tailored to industry-specific needs, applying Scrum methodology to streamline workflows and ensure timely project delivery.

FULLSTACK • MAGMALABS • AUGUST 2023 – JANUARY 2024

Specialized in delivering comprehensive technology solutions as a Java Developer with expertise in both front-end and back-end development.

- Led the development of Bright-Coders, an educational platform built with React Native, Ruby on Rails, and TypeScript, resulting in a 40% increase in user engagement.
- Served as Scrum Master, overseeing sprint planning, daily stand-ups, and retrospectives, leading to a 20% improvement in team productivity.
- Integrated third-party APIs and optimized database management (SQL Server, Oracle), significantly enhancing system functionality and scalability.

FULLSTACK • DEVITM • JANUARY 2022 – JULY 2023

Started my professional career at Devitm, developing simple web applications for clients using Vue.js, TypeScript, and MySQL.

- Introduced and adopted Scrum for project management and application development.
- Led client interactions to gather requirements and translate them into technical specifications.
- Coordinated with internal teams to ensure alignment and meet project expectations.
